ClientLocker — Project Plan

Project Overview

ClientLocker is a secure client file management platform designed for accounting firms. It enables accountants to securely upload, organize, and share sensitive client documents — including tax returns, financial statements, and compliance records — through an intuitive web portal with enterprise-grade security.

Technology Stack

Layer	Technology	Purpose
Frontend	React 19 + Vite	Fast, component-based UI
Styling	Bootstrap 5	Responsive, professional design
Backend	Node.js + Express.js	REST API server
Database	Supabase PostgreSQL	Client and file metadata storage
Auth	Supabase Authentication	Secure login, role-based access
Storage	Supabase Storage	Encrypted client file storage
CI/CD	GitHub Actions	Automated build and secret scanning
Hosting	Vercel	Frontend deployment with auto-redeploy

Core Features (Planned)

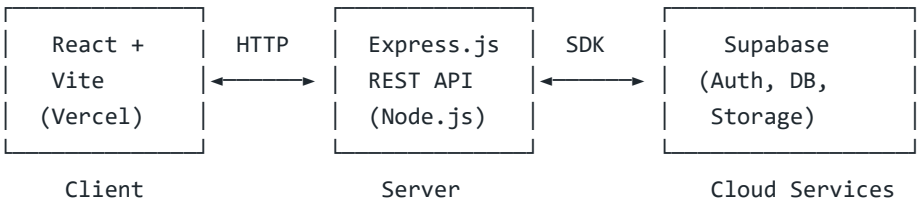

1. **Secure Authentication** — Email/password login with Supabase Auth and role-based access (Admin, Accountant, Client).
2. **Client Management** — Add, view, edit, and organize client profiles with contact info and notes.
3. **File Upload & Storage** — Drag-and-drop file upload with Supabase Storage; organized by client and category.
4. **File Sharing** — Generate secure, time-limited download links for clients.
5. **Dashboard** — Overview of recent uploads, client activity, and storage usage.

6. **Audit Trail** — Log who uploaded, downloaded, or deleted files and when.

Project Milestones

Milestone	Target Date	Deliverables	Status
M1	Nov 7	Project setup, GitHub repo, CI/CD, Vercel deploy, plan	✅ Complete
M2	Nov 21	Landing page, login/signup UI, Supabase Auth integration	Planned
M3	Dec 5	Client CRUD, dashboard, database schema	Planned
M4	Dec 19	File upload/download, storage integration	Planned
M5	Jan 2	Sharing, audit trail, polish, final presentation	Planned

Architecture

Security Measures

- Environment variables stored in `.env` files (never committed to Git)
- Gitleaks GitHub Action scans every push for accidentally leaked secrets
- Supabase Row Level Security (RLS) for database access control
- HTTPS enforced via Vercel
- CORS configured on the Express server
